## Steps to query data:

- Go to https://www-fars.nhtsa.dot.gov/QueryTool/querysection/selectyear.aspx
- 2. Select the desired year in the top right corner and click submit
- 3. Select all fields using the designated button and click submit

Select the "day of week" you desire

5.

6. Select "Crash Hour" for the columns and "Atmospheric Condition (1)" for the rows, then click submit

	Column	Crash Hour
		(N
	Group By	None
Row Atmospheric Condition (1)  Group By None	<b>‡</b>	Count
Select Data to Count: Number of Crashes		
Show ZERO Values:		
Report Title:		
Search Criteria: Year 2016 CRASH: Day Of Week 2		
		Submit

7. If desired, click "Export" to download the data as a .txt file. This file can be opened in Excel using tab as the delimiter. I repeated all of these steps for each day of the week. Below is an example of a report for a single day of the week. I then copied the values of each column into a custom Excel spreadsheet I had made, which had every possible combination of day of the week, atmospheric condition, and

time.

OUTPUT OPTIONS:

Atmospheric Condition (1)	Crash Hour Hour Crash Hour Crash Hour Crash Hour Hour Crash Hour C															10:							
	0:59am	1:59am	2:59am	3:59am	4:59am	5:59am	6:59am	7:59am	8:59am	9:59am	10:59am	11:59am	12:59pm	1:59pm	2:59pm	3:59pm	4:59pm	5:59pm	6:59pm	7:59pm	8:59pm		10:
